

Aquaversa

The Multipure Aquaversa is a durable, stainless-steel water filter with the versatility to work on the countertop or below the sink. It provides all the taste and health benefits of Multipure filtered water, in a sturdy, easy-to-install package.

Countertop Kit (MP750SC)

This unit sits on your counter next to the sink and connects to your existing faucet using a hose and diverter valve that allows you to easily switch from filtered to unfiltered water. The MP750SC unit may be converted to a below-the-sink unit with the purchase of a conversion kit.

Below-The-Sink Kit w/ Faucet (MP750SB)

This popular model comes with its own specially designed drinking water faucet which is installed directly on your sink, using little space. This versatile unit, installed below your sink, can sit on the cabinet floor or be mounted on the cabinet wall with a bracket. It may be connected to an icemaker or other device, using an optional tee, and it may be converted to a countertop unit with the purchase of a conversion kit. Faucet Available in multiple colors.

Below-The-Sink Kit w/ In-Line Connector (MP750SI)

This unit is excellent for use with inline applications such as icemakers, instant hot units, coffee machines, various restaurant uses, etc. Comes with easy connect fittings; however, no installation fixtures or accessories are provided.

Capacity Monitor Kit (MP1200EL)

A below-the-sink model that features a capacity monitor that increases the filter life to approximately 1,200 gallons. An easy to read light flashes at the faucet, indicating it is time to replace the filter.

Benefits & Features

- Easy and convenient to use; provides delicious, clear, healthier drinking water whenever you need it.
- Better-tasting beverages - coffee, tea, juices, and drinks of all kinds.
- Use for food preparation, improving the taste of fruits and vegetables.
- Highest quality water for cooking - better pasta and sauces, soups, etc.
- Your pets will love it too!
- Guaranteed quality backed by an outstanding customer satisfaction guarantee and warranty.
- Cost-effective solution to meet your budget and replaces costly bottled water
- Attaches easily to your faucet without tools.
- Reliable protection for all of your family's drinking water needs.

Specifications

Housing Composition	Stainless Steel
Faucet Composition	Chrome plated lead-free
Rubber Items	Nitrile (NBR)
Inlet	1/4" Pipe
Outlet	1/4" Pipe
Replacement Filter	Model CB6
Approximate Capacity	750 Gallons
Approx. Flow Rate	0.75 gpm @ 60 psi
Water Pressure	100 psi max/30 psi min
Weight (Basic Unit)	5.0 lbs.
Height	9.4 inches
Body diameter	6.0 inches
Particulate Retention Size	Sub Micron
Housing Warranty	Lifetime

Filter life will vary in proportion to the amount of water used and the level of impurities in the water being processed. Claims of capacity are not applicable to contaminants reduced by mechanical filtration because of broad variations in the quality and quantity of physical matter in your drinking water. Your Multipure filter will clog, protecting you from these contaminants, and your flow rate diminishes. For contaminants reduced by adsorption, filter life/capacity is 750 gallons. It is recommended that the filter be replaced when the first of the following occurs: (a) annually, (b) the unit's rated capacity is reached, (c) the flow rate diminishes, (d) the filter becomes saturated with bad tastes and odors.

Carbon Block Technology

Multipure Drinking Water Systems utilize Multipure's innovative and proprietary solid carbon block filter. This solid carbon block filter employs multiple methods to reduce the presence of a wide variety of contaminants in water. Its pre-filter traps dirt, sand, and particles that affect the taste, odor, and clarity of water. Particles too small to be trapped mechanically are then electrokinetically adsorbed to the pre-filter surface. As water passes the pre-filter, the solid carbon block physically traps particles and chemically adsorbs the many different chemicals, pesticides, herbicides, and certain heavy metals that remain in the water. Because the solid carbon block filter is densely compacted, its surface area is maximized and water remains in contact with the filter material for an extended period of time. This extended contact period between the water and the filter ensures a consistently high degree of performance.

Nationally recognized standards established for the drinking water treatment industry confirm that the most effective systems for the removal of both aesthetic and harmful contaminants are those that utilize solid carbon block filters. Multipure is the original developer of solid carbon block technology, and has been the leader and innovator in the water treatment industry since 1970. Multipure, and its remarkable solid carbon block filter, is synonymous with superior quality, exceptional innovation, and intelligent performance. With a Multipure Drinking Water System, you are guaranteed the best.
